

BASIC MARINE ELECTRICS COURSE

Do you know your Volts from your Ammeter?

Even on new boats, electrics can be confusing, but once a few years old and a few things added to the system... Well, then no one can remember which wire is which? Want to know how to fix your own bilge pump? Test your batteries?

Suitable for complete beginners - no previous experience is required.

CONTENT:

- "12V DC"... what is it?
- Batteries - types, testing, maintenance/care
- Charging systems - alternator, split charger...
- Solar systems
- Anodes / Galvanic protection
- Checks & Fault-finding
- Multimeter - how to use them. Measuring Volts, Amps, Resistance. Continuity test
- Joining wires, terminating wires - Options / Tools / Best practice

COURSE DURATION: 1 DAY
