

BASIC OUTBOARD ENGINE COURSE

Do you know your spark plug from your piston?

Outboards aren't always the best maintained... but are expected to work whenever the sun shines and you want to go out on the water.

Want to know how best to look after your outboard and give it a long and reliable life?

Suitable for complete beginners - no previous experience is required.

CONTENT:

- The principles of a petrol engine - 2 stroke vs 4 stroke, engine oil etc.
- Fuel system - carburettor, tank, primer, filter
- Cooling system - impeller, thermostat, telltale
- Electrical system - charging, warning, ignition
- Propellers - choice, hubs, etc.
- Anodes - Galvanic protection
- Checks & Fault-finding
- Routing maintenance / Servicing
- Winterising

COURSE DURATION: 1 DAY
